

e-Filing Gateway

The Altus e-filing Gateway is a packaged solution for electronic HMRC reporting that provides a range of benefits beyond simple compliance.

THE CHALLENGE

HMRC are introducing electronic filing services for all tax reporting regimes and increasingly making their use mandatory by phasing out paper returns. Many companies view e-filing as an additional regulatory burden but some recognise that it is also an opportunity to streamline and improve control over reporting processes.

In some cases, HMRC has provided on-line forms for companies to manually type in their returns via the internet. This offers a simple solution, but will be unsuitable for significant volumes of data and leaves some important issues unresolved.

THE SOLUTION

The Altus e-filing Gateway manages the whole HMRC reporting process from compilation, validation, and approval to electronic submission and confirmation. A full audit trail is maintained including the original return, all responses and errors, and the actions of each user.

The Altus e-filing Gateway supports a range of HMRC reporting regimes including PAYE RTI and Pensions (including the Pension Scheme Return, Event Report and Accounting for Tax). Altus is an Approved Partner for the Government Gateway and our product has passed HMRC recognition tests for each of the reporting regimes that we support.

THE ALTUS ADVANTAGE

- **Market Leading Automation** – AeG is the leading HMRC e-filing product for pension administrators.
- **A Complete Solution** – AeG handles the whole e-filing process for PAYE RTI and Pension returns.
- **Compliance** – AeG is fully compliant with all relevant HMRC and Government Gateway standards.
- **Convenience** – Returns can be securely uploaded either directly from administration systems via web services or from a spreadsheet provided as part of AeG.
- **Flexibility** – AeG can be configured to adapt to the products, processes, controls, organisational structure and security requirements of each organisation.
- **Simplicity** – AeG is provided as a hosted service allowing quick and simple implementation.
- **Security** – AeG is highly secure with multiple levels of authentication, fine-grained authorisation and a comprehensive audit trail.
- **Independence** – Altus is an independent systems company committed to the use of open and interoperable standards. We are not tied to any standard, network or group of providers.
