

# Managing Regulatory Change: Addressing data privacy and protection

Jonathan Stallard  
Lee Fairey

# Why has RegTech come to the fore?

**“Regulation must be considered a permanent rise in sea level – not just a flowing tide that will ebb or even a cresting tsunami that will recede.”**

***Gerold Grasshoff  
Boston Consulting Group***

BCG

**“Tech and regulation must go hand in hand, it is no longer possible to have humans manage regulatory change”**

*Ruth Wandhofer,  
Global Head Regulatory,  
Market & Innovation Strategy*

# Leveraging AI and Machine Learning to manage regulatory change

Automating RegChange

Transforming costly and risky people-centric compliance processes into a pro-active and agile compliance lifecycle

Continuous capture of regulatory change

Intelligent mapping of regulation to your business

Deep insight into the impact of regulatory change

Applying regulatory change to maintain compliance

# Navigating GDPR

*Under the new GDPR rules, it is mandatory that any breach is reported to the Information Commissioner's Office (ICO) and, in most cases, the data subject within 72 hours.*

*Cross-border conflict in regulations is rife – retention versus privacy*

**By the end of 2018, more than 50% of companies affected by the GDPR will not be in full compliance with its requirements.**

**Gartner**<sup>®</sup>

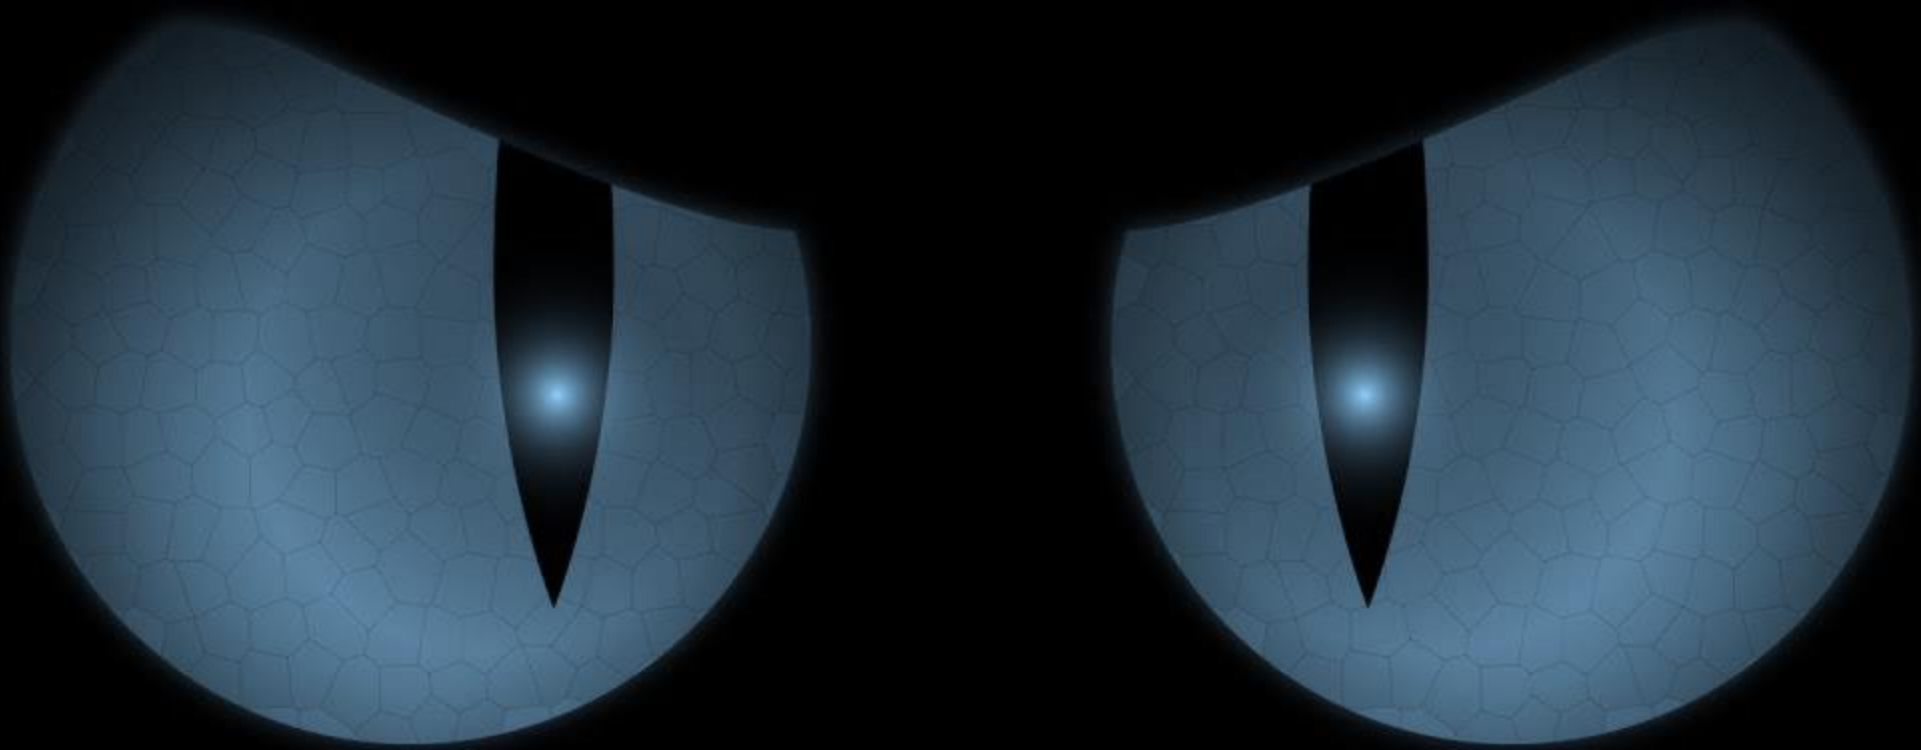

No need to panic!

Just a little bit of data we need to work around...

# GDPR - the monster at the table?
